

ATUL KUMAR

54atul@gmail.com | +91-8209320181 | LinkedIn | GitHub

Professional Summary

- Data Engineer with 3+ years of experience designing and optimizing ETL pipelines, building scalable data workflows, and deploying cloud-native solutions on Azure Cloud. Skilled in Python, SQL, PySpark, and Big Data technologies with hands-on experience in real-time data processing and streaming on Azure. Proven ability to deliver end-to-end data engineering solutions from real-time event ingestion to data warehouse modeling for enterprise-scale systems.

Education

Army Institute of Technology, Pune — B.E in Mechanical Engineering CGPA: 7.6	May 2019 – Jun 2023
Bhagat Public School, Kota — CBSE Class XII First Division	May 2017 – Jun 2018
Shiv Jyoti Sr. Sec School, Kota — CBSE Class X CGPA: 9.4	Apr 2015 – May 2016

Experience

Oracle Financial Services Software | Associate Consultant Aug 2023 – Present

- Designed and optimized complex SQL queries, stored procedures, and functions to support large-scale ETL pipelines and reporting workflows for insurance domain applications, improving query performance and data throughput.
- Automated end-to-end data processing using SQL and scripting, integrating CI/CD practices to streamline SQL script generation, validation, and deployment reducing processing time and minimizing human error in data workflows.
- Configured and maintained XML-based business rule definitions in Oracle Rules Palette to drive server-side data logic, enabling real-time, database-driven updates across downstream UI modules including insurance data domains.
- Conducted rigorous data validation, debugging, and SQL performance tuning reducing query runtimes by 30% and improving overall reliability of data pipelines serving enterprise insurance systems.
- Collaborated with business analysts, application teams, and architects to design and deliver data integration solutions supporting scalable, high-volume data workflows for enterprise insurance clients.

Solytics Partners | Software Developer Intern Jun 2021 – Mar 2022

- Designed and maintained backend APIs using Python to enable seamless communication between client applications and the server, ensuring reliability and scalability.
- Implemented web scraping solutions using Python to extract actionable data from various websites, automating data collection processes.

Projects

Project 1: Real-Time Ride-Hailing Analytics Platform

- Architected an end-to-end real-time streaming pipeline ingesting live ride-booking events via **Azure Event Hubs (Kafka-compatible)**, generated by a simulated **FastAPI** web application, into **Azure Data Lake Storage Gen2**.
- Orchestrated batch and streaming ELT pipelines using Azure Data Factory to ingest historical and reference data into ADLS Gen2
- Built a Medallion architecture in Databricks using Spark Declarative Pipelines, enabling scalable processing of streaming and batch workloads.
- Engineered a **metadata-driven framework** using **Jinja templates + PySpark/SQL** to dynamically generate complex joins for a **One Big Table (OBT)** in the Silver layer, eliminating hardcoded logic
- Modeled a **Star Schema** in the Gold layer with **SCD Type 1 & Type 2** via **Databricks autoCDC** to serve downstream analytics while accurately tracking historical dimension changes.

Project 2: Olympic Data Analytics

- Built an end-to-end data workflow using **Azure Data Factory**, **Azure Databricks**, and **Azure Synapse Analytics** to process and analyze **10,000+ records** of Olympic data.
- Created interactive dashboards in Power BI to visualize medal trends and performance, enabling data driven-decision making.
- Reduced data processing time by 40% through query optimization and parallel processing.

Skills

- **Programming languages** : C++, Python, Java, SQL, XML
- **Cloud Tools**: Azure Synapse Analytics, Data Warehousing, Event Hubs, Azure Databricks, Azure Data Factory, Apache Kafka, Git, Excel, Power BI, PySpark, Azure Delta Lake

Achievements / Certifications

- Oracle Cloud Infrastructure Certified Foundations Associate [\[Verify\]](#)
- Served as **Joint Secretary of the Radio Club** at Army Institute of Technology, Pune. Organized and managed inter and intra-college events.
